Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charlotte Wilson on July 28, 2006.

The application has been amended as follows:

Please replace the final line of claim 25 with,

-- cohesion parameter being between about $\text{MPa}^{1/2}$ and $19 \text{ MPa}^{1/2}$, wherein the second polymer is not ethylene-methyl acrylate copolymer --.

In their reply to the Examiner's previous correspondence, Applicant had indicated that they believed claim 25 was patentable given that the table provided in their Specification outlining cohesion parameters for different (co)polymers had reported a cohesion parameter associated with ethylene-methyl acrylate of 18, which had been outside of the range contemplated in new claim 25. The Examiner expressed concern however that, in all probability, not all incarnations of ethylene-methyl acrylate copolymer had a cohesion parameter outside of this range as evidenced at least in part by the fact that the CRC handbook submission furnished earlier by Applicant recited significantly-sized cohesion parameter *ranges* for each genus of polymer. The Examiner recommended that Applicant simply insert a proviso into claim 25 stipulating that the second polymer was not ethylene-methyl acrylate which, in the Examiner's

estimation does not represent new matter because Applicant had expressly mentioned this embodiment as one for the second polymer in the original disclosure (the amendment not being unlike the removal of one or more members from a claimed Markush group). Applicant indicated that they were amenable to the change and, further, requested that the Examiner change the range in claim 25 to make it consistent with the full range disclosed in the Specification.

Although semi-IPNs are certainly known, the number of silicone semi-IPNs numbering many fewer, there were no teachings outside of the Parker reference of the employment of a silicone semi-IPN of an airbag coated with the same. Therefore, claims 10-12, 15-17, and 23-25 are allowable.

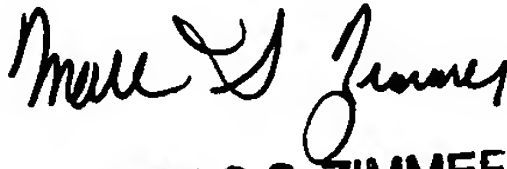

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
